

Air Conditioning

For over 10 years, Vaillant air conditioning systems have been the preferred choice for discerning domestic and commercial customers across mainland Europe. Now available in the UK, they have been tried, tested and proven in a huge variety of applications - and because all Vaillant systems incorporate the latest technology to heat as well as cool, our systems offer genuine year round climate control.

What is more, each unit has plenty of built-in convenience features, normally only found in much more expensive products, so they represent unbeatable value.

What is air conditioning

The term most commonly refers to cooling and dehumidifying air
