

Understand your controls

Here's a quick guide on how to use your new control

Upgrade your heating with app connectivity

Making your home more comfortable just got easier

Combining myVAILLANT connect internet gateway with your sensoCOMFORT control gives full system visibility wherever you are - with the myVaillant app.

myVaillant app is more than just an app. It's a smart home ecosystem, that gives you more flexibility and control, making your home even more comfortable.

Features and benefits

Smart heating

Full control of your heat pump at your fingertips. Anytime, anywhere.

Smart home integration

myVaillant allows users to conveniently adjust the temperature through simple voice commands with Amazon Alexa and Apple HomeKit*.

Increased comfort

Always at exactly the right temperature: turn your heating or hot water on when you're travelling home, and the perfect climate will welcome you home.

Higher reliability

Faster service, less downtime, more peace of mind for you and your loved ones: in the world of myVaillant, everything is connected.

Fit for the future

Smart ecosystem that constantly improves and expands. Frequent updates will add more useful functions and smart ideas.

Lower consumption

myVaillant can save energy when you're away and track your usage when you're home so you can be efficient with your heating habits.

Setting the time and date

- Press the menu button **5** twice
- Use the scroll bar **2** to locate the settings menu
- Press the confirm button **4** to select settings
- Then scroll to Language, Time and Display
- Set the correct date using the scroll bar and press the confirm button **4**
- Now select the time using the same step above

Setting your time programmes

- Press the menu button **5** followed by the help button **3**
- Scroll and select Time Programme Assistant
- You will first be asked for your desired temperature
- You will then be asked a series of questions to generate a heating schedule

Holiday mode

- Press the menu button **5**
- Go to control and select absence
- Select the zone you want to set to away
- Input the time and date that you leave and return, with the scroll bar. During this time, the set back temperature will be set and not fall below this

Temperature override

- Press the menu button **5**
- Using the scroll bar, simply slide or tap to the desired temperature
- Select for how long you would like the override to set for
- If you'd like to remove the override, select the back button **6**

Have the ability to manage your heating effortlessly, set routines for optimum comfort and keep energy costs under control, all by using the myVaillant app. Taking comfort to a new level, the myVaillant app makes controlling your heat pump smarter, faster, more intuitive and more technologically advanced than ever before. Plus, offer additional peace of mind with the help of Vaillant's Smart Home Subscription.

Please note: an additional plug socket may be required.

For support with upgrading your heating system with a myVAILLANT connect internet gateway, please contact your local installer.

Smart Home Subscriptions

Enjoy total peace of mind

With the seamless addition of the myVAILLANT connect internet gateway to your new heating system, you can access the benefits of our Smart Home Subscription. Vaillant's free Smart Home Subscription is designed to provide effortless control over your home heating system, backed by expert support when you need it. With the seamless installation of your Vaillant heating system, you can access the benefits of our Smart Home Subscription wherever you are.

- ✓ **Assisted appliance support**
myVAILLANT connect internet gateway monitors the health of your heat pump, meaning that if an error should occur, you'll receive a notification through myVaillant app. If you call our friendly team, we can remotely support and offer advice on your heating system.
- ✓ **Smart reassurance with appliance health checks**
Total reassurance with a quarterly health check report to check key system components are running smoothly for ideal performance.
- ✓ **Handy hints & tips**
With quarterly health check reports sent directly to your inbox, we'll even send handy hints and tips on how to increase the energy efficiency of your heating system.
